# ELI WMS: Reinventing logistics with App Engine and Google APIs

Using Google Cloud Platform and some inspired lateral thinking, a small team at a mid-size Italian company created a groundbreaking warehouse management system with uses far beyond their original goals.

## About ELI WMS

Originally developed in 2017 for Saccheria Fratelli Franceschetti, ELI WMS is an independent SaaS warehouse management solution that makes industrial logistics simple. With minimal overheads, ELI integrates with existing hardware to make shipping more efficient. More about ELI WMS at [www.eliwms.com](http://www.eliwms.com)
